STELIUM S1

## DESCRIPTION

Stelium is a flexible multi use luminaire that can be mounted via pivoting mechanical interfaces to differing pole dimensions. Thanks to the wide range of optical options available Stelium can be used in most applications that call for a cost effective, long lasting and upgradable luminaire. Sophisticated electronics provides compatibility with a range of management systems, both centralised and decentralised.

## CONTROL OPTIONS

STELIUM by Eclatec represents the latest in control systems, both centralised and decentralised. Adjustable current on the driver or at the bottom of the pole. Dimming as above as well as via bluetooth. Both form factors support remote detection while Stelium 1 (S1) supports built in detection. Smart-Ready<sup>(R)</sup> configuration (ZD4i) with double Smart-Ready for X versions. When used with a local network, communication can be detected with a pilot wire and/or wireless communication sensing. Remote management via WIZARD CMS system.
